## Quantum Field Theory in Curved Spacetime Shintaro Sawayama

### Abstract

I wrote this book for Japanese, because in Japan there is no book of quantum field theory in curved spacetime. However, I translate Japanese book for English. And the reason to write this book is there is no book that writes the derivations of Green function. We should read papers from now on. However, in this book, I write the derivations of Green function.

This book mainly depend on review of L.H.Ford[48] and the book of Birrell and Davies[24] and my doctor thesis. However, I discuss conformal coupling and the derivation of Green function and black hole evaporation. The black hole evaporation is solved by Sawayama in 2006[1]. And section 6 is mainly depended on my paper. The problem of black hole evaporation is difficult, because we should solve field equations i.e. forth order partial differential equations. However, I solved this problem by another method that is same as solving field equation. The black hole evaporation is advocated by Hawking in 1975. He said black hole may be vanishing. However, it is difficult problem, because we should solve field equations. To read this book we know quantum field theory and general relativity.

### index

Section 1 Elemental theories and particle creations

Section 2 Hawking Effect

Section 3 Green Function

Section 4 Negative Energy

Section 5 Fluctuation of metrics

Section 6 black hole evaporation

### From reader reviews:

#### **William Perez:**

Have you spare time for the day? What do you do when you have a lot more or little spare time? Yeah, you can choose the suitable activity for spend your time. Any person spent their spare time to take a stroll, shopping, or went to often the Mall. How about open as well as read a book eligible Quantum Field Theory in Curved Spacetime? Maybe it is for being best activity for you. You understand beside you can spend your time with your favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have some other opinion?

#### **George Rodriguez:**

Nowadays reading books be a little more than want or need but also turn into a life style. This reading routine give you lot of advantages. The huge benefits you got of course the knowledge your information inside the book this improve your knowledge and information. The information you get based on what kind of publication you read, if you want send more knowledge just go with training books but if you want feel happy read one having theme for entertaining for example comic or novel. The Quantum Field Theory in Curved Spacetime is kind of book which is giving the reader unforeseen experience.

#### **Faye Bolin:**

Information is provisions for those to get better life, information these days can get by anyone at everywhere. The information can be a information or any news even restricted. What people must be consider any time those information which is inside the former life are hard to be find than now's taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you get the unstable resource then you buy it as your main information you will have huge disadvantage for you. All of those possibilities will not happen throughout you if you take Quantum Field Theory in Curved Spacetime as your daily resource information.

#### **Carlie Manson:**

The book untitled Quantum Field Theory in Curved Spacetime contain a lot of information on the item. The writer explains the woman idea with easy way. The language is very simple to implement all the people, so do certainly not worry, you can easy to read that. The book was published by famous author. The author will bring you in the new time of literary works. You can actually read this book because you can continue reading your smart phone, or product, so you can read the book throughout anywhere and anytime. If you want to buy the e-book, you can available their official web-site in addition to order it. Have a nice read.
