Neuroscience - Elsevier E-Book on VitalSource (Retail Access Card): Fundamentals for Rehabilitation, 4e Laurie Lundy-Ekman PhD PT

- Includes clear descriptions of a wide range of neurological disorders and the body system they affect to help make complex information easier to master and to provide the framework essential for understanding the nervous system
- Uses full-color clinical and gross photographs to clarify the spatial relationships among neural structures and show pathological neural changes
- A color atlas provides gross photographs and scans with accompanying diagrams that label key structures in the brain
- Numerous tables, flow charts, and boxes highlight essential concepts, processes, and relationships
- At-a-Glance Disorder boxes outline the pathology, etiology, signs and symptoms, and prognoses of the most common neurological disorders to provide a quick summary of the features of neurological disorders commonly encountered in clinical practice
- Clinical Notes at the end of the chapter sections provide relevant case studies with questions to demonstrate clinical applications of neuroscience knowledge and challenges the student to apply the information to clinical situations
- Review Questions at the end of each chapter help students focus on key subject matter from each chapter
- Actual patient stories set the scene for many chapters to help the student and clinician relate the scientific information to clinical reality
- A DVD with approximately 40 video clips and animations supports concepts in the text
- Chapter outlines at the beginning of each chapter succinctly define the chapter content
- Red Flags boxes highlight physical and psychological manifestations of neurological disorders
- Nearly 90 new illustrations have been added to reflect updated research and new topics
