Foundations of Predictive Analytics (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series)

James Wu, Stephen Coggeshall

Foundations of Predictive Analytics (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) James Wu, Stephen Coggeshall

Drawing on the authors' two decades of experience in applied modeling and data mining, **Foundations of Predictive Analytics** presents the fundamental background required for analyzing data and building models for many practical applications, such as consumer behavior modeling, risk and marketing analytics, and other areas. It also discusses a variety of practical topics that are frequently missing from similar texts.

The book begins with the statistical and linear algebra/matrix foundation of modeling methods, from distributions to cumulant and copula functions to Cornish–Fisher expansion and other useful but hard-to-find statistical techniques. It then describes common and unusual linear methods as well as popular nonlinear modeling approaches, including additive models, trees, support vector machine, fuzzy systems, clustering, naïve Bayes, and neural nets. The authors go on to cover methodologies used in time series and forecasting, such as ARIMA, GARCH, and survival analysis. They also present a range of optimization techniques and explore several special topics, such as Dempster–Shafer theory.

An in-depth collection of the most important fundamental material on predictive analytics, this self-contained book provides the necessary information for understanding various techniques for exploratory data analysis and modeling. It explains the algorithmic details behind each technique (including underlying assumptions and mathematical formulations) and shows how to prepare and encode data, select variables, use model goodness measures, normalize odds, and perform reject inference.

Web Resource

The book's website at www.DataMinerXL.com offers the DataMinerXL software for building predictive models. The site also includes more examples and information on modeling.

From reader reviews:

Kimberly Rubio:

Nowadays reading books become more than want or need but also become a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge your information inside the book in which improve your knowledge and information. The info you get based on what kind of publication you read, if you want get more knowledge just go with education and learning books but if you want experience happy read one together with theme for entertaining including comic or novel. Typically the Foundations of Predictive Analytics (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) is kind of reserve which is giving the reader capricious experience.

Mary Tillman:

This Foundations of Predictive Analytics (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) is great e-book for you because the content that is certainly full of information for you who always deal with world and still have to make decision every minute. This book reveal it facts accurately using great arrange word or we can claim no rambling sentences in it. So if you are read it hurriedly you can have whole facts in it. Doesn't mean it only provides you with straight forward sentences but tricky core information with wonderful delivering sentences. Having Foundations of Predictive Analytics (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) in your hand like obtaining the world in your arm, data in it is not ridiculous a single. We can say that no guide that offer you world with ten or fifteen small right but this e-book already do that. So , this is certainly good reading book. Hi Mr. and Mrs. stressful do you still doubt in which?

Lee Parkin:

You may get this Foundations of Predictive Analytics (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) by look at the bookstore or Mall. Only viewing or reviewing it might to be your solve difficulty if you get difficulties for the knowledge. Kinds of this guide are various. Not only by written or printed but also can you enjoy this book through e-book. In the modern era just like now, you just looking from your mobile phone and searching what their problem. Right now, choose your own ways to get more information about your reserve. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose proper ways for you.

Sammy Cheney:

Publication is one of source of know-how. We can add our expertise from it. Not only for students and also native or citizen require book to know the upgrade information of year to be able to year. As we know those publications have many advantages. Beside all of us add our knowledge, may also bring us to around the world. From the book Foundations of Predictive Analytics (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) we can have more advantage. Don't that you be creative people? To become

creative person must prefer to read a book. Simply choose the best book that suitable with your aim. Don't always be doubt to change your life at this time book Foundations of Predictive Analytics (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series). You can more attractive than now.
