The Art of Multiprocessor Programming

Maurice Herlihy, Nir Shavit

The Art of Multiprocessor Programming Maurice Herlihy, Nir Shavit

As the computer industry changes from single-processor to multiprocessor architectures, this revolution requires a fundamental change in how programs are written. To leverage the performance and power of multiprocessor programming, also known as multicore programming, you need to learn the new principles, algorithms, and tools presented in this book. It includes fully-developed Java examples detailing data structures, synchronization techniques, transactional memory, and more.

Prof. Maurice Herlihy, who coined the phrase "transactional memory," is on the faculty of Brown University. He is the recipient of the 2003 Dijkstra Prize in distributed computing. Prof. Nir Shavit is on the faculty of Tel-Aviv University and a member of the technical staff at Sun Microsystems Laboratories. In 2004 they shared the Gödel Prize, the highest award in theoretical computer science.

- *The* book on multicore programming, the new paradigm of computer science
- Written by the world's most revered experts in multiprocessor programming and performance
- Includes examples, models, exercises, PowerPoint slides, and sample Java programs

From reader reviews:

Frank Hegarty:

Information is provisions for individuals to get better life, information these days can get by anyone in everywhere. The information can be a information or any news even a problem. What people must be consider if those information which is within the former life are challenging be find than now's taking seriously which one is appropriate to believe or which one the actual resource are convinced. If you get the unstable resource then you have it as your main information there will be huge disadvantage for you. All of those possibilities will not happen with you if you take The Art of Multiprocessor Programming as the daily resource information.

Anthony Youngblood:

You will get this The Art of Multiprocessor Programming by look at the bookstore or Mall. Just viewing or reviewing it can to be your solve challenge if you get difficulties for your knowledge. Kinds of this book are various. Not only by written or printed but also can you enjoy this book by means of e-book. In the modern era such as now, you just looking by your local mobile phone and searching what their problem. Right now, choose your ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still up-date. Let's try to choose correct ways for you.

Noah Hansell:

What is your hobby? Have you heard which question when you got students? We believe that that query was given by teacher on their students. Many kinds of hobby, All people has different hobby. Therefore you know that little person similar to reading or as reading become their hobby. You need to understand that reading is very important and also book as to be the point. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You see good news or update about something by book. Different categories of books that can you decide to try be your object. One of them is niagra The Art of Multiprocessor Programming.

Sally Canady:

Reading a e-book make you to get more knowledge from it. You can take knowledge and information from a book. Book is prepared or printed or created from each source in which filled update of news. Within this modern era like right now, many ways to get information are available for you. From media social similar to newspaper, magazines, science reserve, encyclopedia, reference book, story and comic. You can add your understanding by that book. Are you ready to spend your spare time to open your book? Or just trying to find the The Art of Multiprocessor Programming when you required it?
