Based on the premise that the movements of the body are the projection of a person's deepest and most private thoughts and feelings, this breakdown of movement creates a comprehensive analysis of the body's silent language. This scientific approach to body language argues that movement and gesture—signals constantly emitted by the human body—can be interpreted and understood as accurately as verbal expression, and perhaps even more so.

Basado en la idea que los movimientos del cuerpo son proyecciones de las creencias y emociones más oscuras y privadas de una persona, esta interpretación del movimiento descubre el vocabulario silencioso del cuerpo. Esta análisis científico del lenguaje del cuerpo propone que alguien puede interpretar y entender los movimientos y los gestos—las señas emitidas constantemente por el cuerpo—tan exactamente, tal vez más, que la expresión verbal.
