## **A Question of Time: An alternative cast of mind** Michael Eldred

The question of time is a question of time. How long will it take for the question concerning time to become THE question of our time? That neither you nor I know. Today the question is still being evaded, as if it had been settled for all time already by Aristotle. Modern science, even today's most advanced quantum physics, despite eschewing Aristotle as superseded, nevertheless remains true to his conception of linear, numeric time. It doesn't want to touch the question for fear of losing control over time as a mathematizable physical variable. But is time physical? The guiding thesis of the present collection of essays is that it is not, but neither is it a formal construct inside subjective consciousness. Therein lies the subversive adventurousness of the study, which is the philosophical companion to *The Land of Matta* (2015).
