Lionel Smith Beale

How to Work With the Microscope: A Course of Lectures on Microscopical Manipulation (Classic Reprint) Lionel Smith Beale Excerpt from How to Work With the Microscope: A Course of Lectures on Microscopical Manipulation

Although only three years have passed since the last edition of this work was published, the author has considered it necessary to make many changes, to enlarge it, and to alter its form. This edition contains nearly IOO pages more than the last, and 150 additional illustrations have been introduced.

The arrangement of the entire work has been simplified. Several of the articles have been re-written, much new matter upon the examination of tissues introduced, and Part V very much extended.

The author has had the advantage of valuable assistance from several friends. To Mr. Sorby he is indebted for articles on the Examination of Rocks and Crystals, and for an able communication on Spectrum Microscopic Analysis. Dr. Maddox has carefully revised Part IV on Photography, and has added much new matter. Mr. Highley has assisted the author in preparing the section on Collecting and Dredging, and that on Aquaria and Vivaria.

About the Publisher

Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com

This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
