Weather signs and how to read them William Allingham

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 Excerpt: ...near the limits of calms and rains, a West India hurricane, or a China Sea typhoon, travels westward towards the islands which seem essential to the propagation of this class of meteor, and then slowly assumes northerly and easterly components, thus following the trend of the land in a measure. Exceptions occur to the general tracks, but the limits of these exceptions are fairly well known. The storm path, track, or trajectory, of a cyclone, is the route followed by the centre of the disturbance as it moves onward. Presuming that a ship is hove-to, the change in the direction of the wind, if any, is sufficient to show in what direction the centre bears from the ship. The most dangerous positions are found directly in front of the storm, or in that segment where, should a ship run before the wind, she is bound to cross the storm track ahead of the centre. Suppose, for example, that on board a ship in the northern hemisphere the wind is increasing rapidly from the north, the barometer is continuously falling, and the wind remains as though nailed at north. What does the navigator rightly deduce from these signs? They tell him that his vessel is right in front of the advancing storm on the path which is being followed by its centre. Suddenly the wind lulls, and the vessel is at the mercy of the confused sea without any assistance from her sails. Just as rapidly, after a short interval dependent on the quickness of advance of the storm and the diameter of the calm central area, the wind bursts out with redoubled fury, but it is now from the southward. The calm area seems poorly developed at times, or it is of insignificant radius, but, generally speaking, the order of events is much like what is related above when a vessel has the storm centre bearing down upon...
