Clarence Osborne Sherrill

Military topography for the mobile forces, including map reading, surveying and sketching, with more than 175 illustrations and one map of vicinity of Fort Leavenworth Clarence Osborne Sherrill

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 Excerpt: ...plotted in d (870). From D the observer sights E and locates e as prescribed for locating C above. ERRORS AND THEIR ADJUSTMENT. The difference in this position of e, and its position as formerly located by triangulation (d) is the accumulated error of the traverse. This error for traverses of 1 to 2 miles would usually be less than 20 feet. An error of 20 feet on the scale of 6" = 1 mile is 1/3 inch and negligible in such filling in 44 work. If the error is large enough to represent as much as 1/3 inch it is distributed among the last few courses as follows, figure 89 (b): A line a' e' is laid off equal in length to a c-f-c d--d e. At e', a line e' e'' is drawn perpendicular to a' e' and equal in length to the error e ex. e'' and a' are joined by a straight line, and d'd'', c' c'' are drawn parallel to e' e''. d'd'' and c' c'' are the amounts to scale of the corrections respectively at d and c. At c and d draw lines parallel to e ex, and equal respectively to c' c'' and d'd'', thus locating the adjusted positions of the stations c, d, etc., at Cx, dx, etc. As will be observed, the adjustment at any station is proportional to the distance of that station from the first station a, and assumes that the error was accumulated gradually throughout the traverse. If the elevation of e as determined by the traverse is not equal to that of ex, the elevation of the traverse station may be adjusted in exactly the same way. In this case e' e''' would be taken equal to the error of elevation on any convenient scale. Suppose the elevation of e is (920), of d is (870). Then lay off e' e''' = 50 feet. Assume a scale of 1 inch = 50 ft. Then e' e''' = 1 inch, d'd''' = .28 inch = .28 X 100 ft. = 28.00 feet. If such an adjustment is neces...

From reader reviews:

Louis Jackson:

As people who live in the modest era should be change about what going on or details even knowledge to make these keep up with the era which can be always change and move ahead. Some of you maybe can update themselves by examining books. It is a good choice for yourself but the problems coming to an individual is you don't know what one you should start with. This Military topography for the mobile forces, including map reading, surveying and sketching, with more than 175 illustrations and one map of vicinity of Fort Leavenworth is our recommendation so you keep up with the world. Why, since this book serves what you want and need in this era.

Yvonne Casey:

This book untitled Military topography for the mobile forces, including map reading, surveying and sketching, with more than 175 illustrations and one map of vicinity of Fort Leavenworth to be one of several books in which best seller in this year, here is because when you read this book you can get a lot of benefit onto it. You will easily to buy this book in the book retail outlet or you can order it by means of online. The publisher in this book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Mobile phone. So there is no reason to you to past this publication from your list.

George Conner:

Often the book Military topography for the mobile forces, including map reading, surveying and sketching, with more than 175 illustrations and one map of vicinity of Fort Leavenworth has a lot of information on it. So when you check out this book you can get a lot of advantage. The book was compiled by the very famous author. The author makes some research ahead of write this book. This book very easy to read you can obtain the point easily after scanning this book.

Andrea Quirk:

Many people spending their time period by playing outside having friends, fun activity together with family or just watching TV the entire day. You can have new activity to invest your whole day by looking at a book. Ugh, do you think reading a book will surely hard because you have to bring the book everywhere? It ok you can have the e-book, taking everywhere you want in your Cell phone. Like Military topography for the mobile forces, including map reading, surveying and sketching, with more than 175 illustrations and one map of vicinity of Fort Leavenworth which is finding the e-book version. So , why not try out this book? Let's notice.
