The Burgess Bird Book For Children: (Thornton Burgess Masterpiece Collection) Thornton Burgess
This book was written to supply a definite need. Its preparation was undertaken at the urgent request of booksellers and others who have felt the lack of a satisfactory medium of introduction to bird life for little children. As such, and in no sense whatever as a competitor with the many excellent books on this subject, but rather to supplement these, this volume has been written. Its primary purpose is to interest the little child in, and to make him acquainted with, those feathered friends he is most likely to see. Because there is no method of approach to the child mind equal to the story, this method of conveying information has been adopted. So far as I am aware the book is unique in this respect. In its preparation an earnest effort has been made to present as far as possible the important facts regarding the appearance, habits and characteristics of our feathered neighbors. It is intended to be at once a story book and an authoritative handbook. While it is intended for little children, it is hoped that children of larger growth may find in it much of both interest and helpfulness.
