The Definitive Guide to SOA: BEA AquaLogic Service Bus targets professional software developers and architects who know enterprise development, but are new to enterprise service buses (ESBs) and service-oriented architecture (SOA) development. This is the first book to cover a practical approach to SOA using the BEA AquaLogic Service Bus tool. And it's straight from the "source"—BEA Systems AquaLogic product lead **Jeff Davies**.

This book provides hands-on information to developing SOA-driven applications with ESBs as central components. It also gives strategic guidance on SOA planning, web service life-cycle management, administration of an ESB, and security considerations. Davies is careful to cut through theory and get straight to demonstrating successful use of the product where SOA really counts.
