Most people have the idea that negative thinking just starts and stops with the mind but the truth is that it does not end there. Negative thinking affects every facet of your life; your finances, health, relationships and family making it hard for you to live a happy fulfilling life.

Just like negative thinking affects different areas in your life, so does positive thinking. By simply thinking positively, you open yourself up to great opportunities and you are likely to be happier even when some things in your life are not so rosy. It is important to understand that thinking positively does not mean that you bury your head in the sand and assume you have no problems. It is about accepting the challenges in your life and focusing on developing on solutions to solve the problem rather than focusing on the problem itself. You also find a silver lining in every problem.

If you want to think more positively and get rid of your negativity and pessimism, then this book will help you achieve that. You will learn some of the mistakes that you need to avoid if you want to become a positive thinker and what to do in order to think positively and become an optimist.
