High Voltage Protection for Telecommunications Steven W. Blume

Sets forth the steps needed to protect critical telecommunications circuits from power faults and lightning in high voltage environments

The need to protect telecommunications circuits from power faults and lightning has never been greater: when power outages or system disturbances occur, reliable telecommunications are essential. With this book as their guide, readers will know what they need to do (and not do) to protect critical telecommunications circuits and equipment located in high voltage environments such as electrical power plants, substations, and power towers. Moreover, the book explains how to get the job done safely, detailing the proper implementation of safety procedures and the use of protective equipment to eliminate or minimize risk.

Setting the foundation, the book begins with an overview of the problem, key issues, industry standards, and safety concerns. Next, it covers:

- Definitions and fundamentals of electric power systems, with regard to HVPT applications
- Causes, boundary conditions, and calculations of ground potential rise
- Critical telecommunications circuits that must be protected in high voltage environments
- Protection schemes and equipment to resolve ground potential rise problems
- Effective installation and testing of high voltage interface equipment
- Personal safety for telecommunications personnel working with equipment in high voltage environments

Throughout the book, the author refers to accepted industry standards and best practices. Written by one of the most respected professional trainers in the telecommunications industry, *High Voltage Protection for Telecommunications* can be used for professional training courses or self-study. It will enable readers to protect critical data and voice communications circuits from high voltage events and protect themselves during equipment installation and maintenance.

From reader reviews:

Jimmie Houck:

Reading a guide can be one of a lot of task that everyone in the world really likes. Do you like reading book thus. There are a lot of reasons why people love it. First reading a book will give you a lot of new information. When you read a e-book you will get new information since book is one of several ways to share the information or even their idea. Second, reading a book will make you more imaginative. When you reading through a book especially fictional book the author will bring that you imagine the story how the figures do it anything. Third, you could share your knowledge to some others. When you read this High Voltage Protection for Telecommunications, you are able to tells your family, friends and soon about yours e-book. Your knowledge can inspire others, make them reading a publication.

Alma Lewis:

People live in this new day of lifestyle always make an effort to and must have the time or they will get wide range of stress from both lifestyle and work. So , whenever we ask do people have extra time, we will say absolutely of course. People is human not really a huge robot. Then we request again, what kind of activity are you experiencing when the spare time coming to you actually of course your answer will certainly unlimited right. Then do you try this one, reading guides. It can be your alternative inside spending your spare time, often the book you have read is High Voltage Protection for Telecommunications.

Tim Vazquez:

Playing with family in a very park, coming to see the water world or hanging out with buddies is thing that usually you could have done when you have spare time, then why you don't try factor that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love High Voltage Protection for Telecommunications, you are able to enjoy both. It is good combination right, you still wish to miss it? What kind of hangout type is it? Oh can occur its mind hangout fellas. What? Still don't understand it, oh come on its referred to as reading friends.

Jessie Davis:

Reading a book to get new life style in this season; every people loves to study a book. When you study a book you can get a large amount of benefit. When you read publications, you can improve your knowledge, mainly because book has a lot of information upon it. The information that you will get depend on what forms of book that you have read. If you wish to get information about your research, you can read education books, but if you want to entertain yourself read a fiction books, these kinds of us novel, comics, and also soon. The High Voltage Protection for Telecommunications will give you a new experience in looking at a book.
