8 questionnaires and corresponding scoring sheets (on CD-ROM and paper now included in both formats in every ASQ:SE box!). Parents complete the short, simple questionnaires at eight designated intervals: 6, 12, 18, 24, 30, 36, 48, and 60 months. Set up like the ASQ-3, these questionnaires prompt parents to answer 22-36 questions with most of the time, sometimes, and rarely or never. Each questionnaire takes just 10-15 minutes for parents to complete and addresses seven crucial behavioral areas: self-regulation, compliance, communication, adaptive functioning, autonomy, affect, and interaction with people.

For every questionnaire, there is an easy-to-use form that allows professionals to score the test in 1-3 minutes and determine the child's progress in that social-emotional area. The reproducible scoring sheets all include referral considerations that help determine if the child needs further evaluation.
