High Energy Materials: Propellants, Explosives and Pyrotechnics Jai Prakash Agrawal

Authored by an insider with over 40 years of high energy materials (HEMs) experience in academia, industry and defense organizations, this handbook and ready reference covers all important HEMs from the 1950s to the present with their respective properties and intended purposes.

Written at an attainable level for professionals, engineers and technicians alike, the book provides a comprehensive view of the current status and suggests further directions for research and development. An introductory chapter on the chemical and thermodynamic basics allows the reader to become acquainted with the fundamental features of explosives, before moving on to the important safety aspects in processing, handling, transportation and storage of high energy materials.

With its collation of results and formulation strategies hitherto scattered in the literature, this should be on the shelf of every HEM researcher and developer.

From reader reviews:

Erin Marshall:

Here thing why this High Energy Materials: Propellants, Explosives and Pyrotechnics are different and reputable to be yours. First of all reading through a book is good nonetheless it depends in the content from it which is the content is as scrumptious as food or not. High Energy Materials: Propellants, Explosives and Pyrotechnics giving you information deeper and different ways, you can find any book out there but there is no e-book that similar with High Energy Materials: Propellants, Explosives and Pyrotechnics. It gives you thrill examining journey, its open up your personal eyes about the thing in which happened in the world which is might be can be happened around you. You can easily bring everywhere like in park your car, café, or even in your method home by train. For anyone who is having difficulties in bringing the branded book maybe the form of High Energy Materials: Propellants, Explosives and Pyrotechnics in e-book can be your substitute.

Martin Solomon:

Hey guys, do you really wants to finds a new book to learn? May be the book with the name High Energy Materials: Propellants, Explosives and Pyrotechnics suitable to you? The book was written by well-known writer in this era. Often the book untitled High Energy Materials: Propellants, Explosives and Pyrotechnicis is one of several books this everyone read now. That book was inspired a lot of people in the world. When you read this guide you will enter the new way of measuring that you ever know just before. The author explained their idea in the simple way, thus all of people can easily to comprehend the core of this book. This book will give you a large amount of information about this world now. So that you can see the represented of the world on this book.

Chad Wright:

A lot of publication has printed but it is unique. You can get it by net on social media. You can choose the best book for you, science, witty, novel, or whatever by searching from it. It is called of book High Energy Materials: Propellants, Explosives and Pyrotechnics. Contain your knowledge by it. Without making the printed book, it could add your knowledge and make an individual happier to read. It is most important that, you must aware about book. It can bring you from one destination to other place.

Theresa Frost:

Some individuals said that they feel uninterested when they reading a reserve. They are directly felt that when they get a half regions of the book. You can choose the book High Energy Materials: Propellants, Explosives and Pyrotechnics to make your personal reading is interesting. Your own personal skill of reading talent is developing when you similar to reading. Try to choose simple book to make you enjoy to see it and mingle the impression about book and looking at especially. It is to be very first opinion for you to like to available a book and learn it. Beside that the guide High Energy Materials: Propellants, Explosives and

Pyrotechnics can to be a newly purchased friend when you're truly feel alone and confuse with the information must you're doing of these time.
