Make A Doll House - How It Works Marc Finius

For tinkerers, collectors, enthusiasts or inventors detailed and proven technical information is very valuable research material. This technical info can be found in patent literature, meaning published patents from your field of work.

This high-quality technical literature stems right from the source - the inventor himself. He describes his invention exactly down to the tiniest detail, often with construction plans and helpful exploded-view drawings.

Here you can buy a collection of selected patents for your selected topic (insert ebook topic). Included in these collections are inventions that have been discovered later or that never went into production because they either were too expensive and difficult to manufacture or just no interested manufacturer was found.

You will receive detailed descriptions and blueprints of constructions, individual parts, component groups, manufacturing processes, raw materials, tools and much more.

What can you do with this literature?

These patent publications show you the detailed functions and features of whole assemblies and component groups and often prove to be a valuable resource for repairs or restorations and often spark new inventions of your own. They are an invaluable help to replicate parts or whole products too.

With this ebook you will receive extremely high-quality technical literature which will help you in many aspects of your job. Additionally it is of course very interesting to browse the records of inventors and see their work and thought processes firsthand.
