Thinking Geometrically: A Survey of Geometries (Mathematical Association of America Textbooks)

Thomas Q. Sibley

This is a well written and comprehensive survey of college geometry that would serve a wide variety of courses for both mathematics majors and mathematics education majors. Great care and attention is spent on developing visual insights and geometric intuition while stressing the logical structure, historical development, and deep interconnectedness of the ideas.

Students with less mathematical preparation than upper-division mathematics majors can successfully study the topics needed for the preparation of high school teachers. There is a multitude of exercises and projects in those chapters developing all aspects of geometric thinking for these students as well as for more advanced students. These chapters include Euclidean Geometry, Axiomatic Systems and Models, Analytic Geometry, Transformational Geometry, and Symmetry. Topics in the other chapters, including Non-Euclidean Geometry, Projective Geometry, Finite Geometry, Differential Geometry, and Discrete Geometry, provide a broader view of geometry. The different chapters are as independent as possible, while the text still manages to highlight the many connections between topics.

The text is self-contained, including appendices with the material in Euclid's first book and a high school axiomatic system as well as Hilbert's axioms. Appendices give brief summaries of the parts of linear algebra and multivariable calculus needed for certain chapters. While some chapters use the language of groups, no prior experience with abstract algebra is presumed. The text will support an approach emphasizing dynamical geometry software without being tied to any particular software.

From reader reviews:

Marie Michael:

Do you one among people who can't read satisfying if the sentence chained within the straightway, hold on guys this specific aren't like that. This Thinking Geometrically: A Survey of Geometries (Mathematical Association of America Textbooks) book is readable by you who hate the straight word style. You will find the facts here are arrange for enjoyable reading through experience without leaving perhaps decrease the knowledge that want to give to you. The writer associated with Thinking Geometrically: A Survey of Geometries (Mathematical Association of America Textbooks) content conveys the idea easily to understand by lots of people. The printed and e-book are not different in the articles but it just different by means of it. So , do you nevertheless thinking Thinking Geometrically: A Survey of Geometries (Mathematical Association of America Textbooks) is not loveable to be your top listing reading book?

Stephen Vancleave:

Thinking Geometrically: A Survey of Geometries (Mathematical Association of America Textbooks) can be one of your basic books that are good idea. We recommend that straight away because this publication has good vocabulary which could increase your knowledge in vocab, easy to understand, bit entertaining but nonetheless delivering the information. The author giving his/her effort that will put every word into enjoyment arrangement in writing Thinking Geometrically: A Survey of Geometries (Mathematical Association of America Textbooks) yet doesn't forget the main position, giving the reader the hottest in addition to based confirm resource information that maybe you can be one among it. This great information may drawn you into completely new stage of crucial imagining.

Sandra Byrom:

You will get this Thinking Geometrically: A Survey of Geometries (Mathematical Association of America Textbooks) by check out the bookstore or Mall. Simply viewing or reviewing it might to be your solve difficulty if you get difficulties for your knowledge. Kinds of this book are various. Not only by simply written or printed but additionally can you enjoy this book by means of e-book. In the modern era like now, you just looking because of your mobile phone and searching what your problem. Right now, choose your personal ways to get more information about your reserve. It is most important to arrange yourself to make your knowledge are still up-date. Let's try to choose proper ways for you.

Sean Owens:

Publication is one of source of knowledge. We can add our knowledge from it. Not only for students but in addition native or citizen have to have book to know the revise information of year to year. As we know those publications have many advantages. Beside all of us add our knowledge, can also bring us to around the world. With the book Thinking Geometrically: A Survey of Geometries (Mathematical Association of America Textbooks) we can have more advantage. Don't you to be creative people? Being creative person

must like to read a book. Only choose the best book that appropriate with your aim. Don't end up being doubt to change your life at this book Thinking Geometrically: A Survey of Geometries (Mathematical Association of America Textbooks). You can more desirable than now.
